

## Your TD SYNnex data, Now in Outlook & Teams

Work stays where you work. The **Microsoft Apps Plugin** streams TD SYNnex pricing, inventory, promos, order tracking, invoices, subscriptions, and the all-new My Business Dashboard into Outlook and Teams. One sign-on, zero context switching, just the data and people you need in the apps you already use.

## Features that empower your productivity

### One install, two apps

One plugin, one sign-on, shared history. Pick up in Outlook exactly where you left off in Teams.

### My business dashboard

View credit details, order summaries and snapshots of your TD SYNnex programs, such as StreamOne Stellr.

### Find contacts

Direct phone / email for your Credit, Sales and Customer Care teams.

### Instant part search

Type a MFG Part #. Get live price, promos, inventory, and logistics instantly.

### Order status & invoices

Paste a PO #. Track shipments and download invoice PDFs in seconds.

### Manage subscriptions

Renewals, usage, and status on licenses from StreamOne Stellr.

### Lead time visibility

Easily view lead times for products directly within Microsoft Teams to help your team quote and plan more accurately.

### Enhanced product cards

Quickly access detailed product specs, availability, and pricing insights at a glance.

### Invoice, order status & serial number export

Export detailed invoice records by serial number or order status to simplify info tracking.

### Order list & filtering

Filter by PO number, status, or date to streamline your daily operations and quickly locate what you need.

### Customizable home page

Select the home page within the app based on the tab you use the most.

### Add to cart functionality

Add products directly to your PartnerFirst Commerce cart from Outlook or Teams for a faster purchasing experience.

## The new unified Microsoft Apps plugin

Microsoft's unified 'Apps' framework lets one plugin run everywhere Outlook and Teams do – desktop, web, and mobile, so every TD SYNnex partner gets the same fast experience, no matter which Microsoft app they open first.
