

ISV ASSESSMENT TOOLS

Unlock Cloud Potential with Assessment Program

Focus on your ideas

You put your idea into action -designed, created, and started a system that gives the best value to your customers — focusing on innovations, features, and functions that revolutionize your business. ISV Assessment tools were created to help ISVs to develop a better plan for the costs involved in moving to the Cloud. We provide a complete study and assessment of the server environment to outline risks, optimization opportunities, and cost management strategies. We will work through a scenario of questions and recommendations that result in a curated guidance report that is actionable and informative. Assessments take time, but it is time well spent.

We build the infrastructure

Our experienced engineers help you build optimal, flexible, and reliable infrastructure that takes most of the administrative tasks out from your shoulders. Letting you focus on what is most important – your ideas. We make a design for you, calculate costs, and advise on how to use the infrastructure in the future best.
