# TD SYNNEX
Advanced Solutions | CloudSolv®
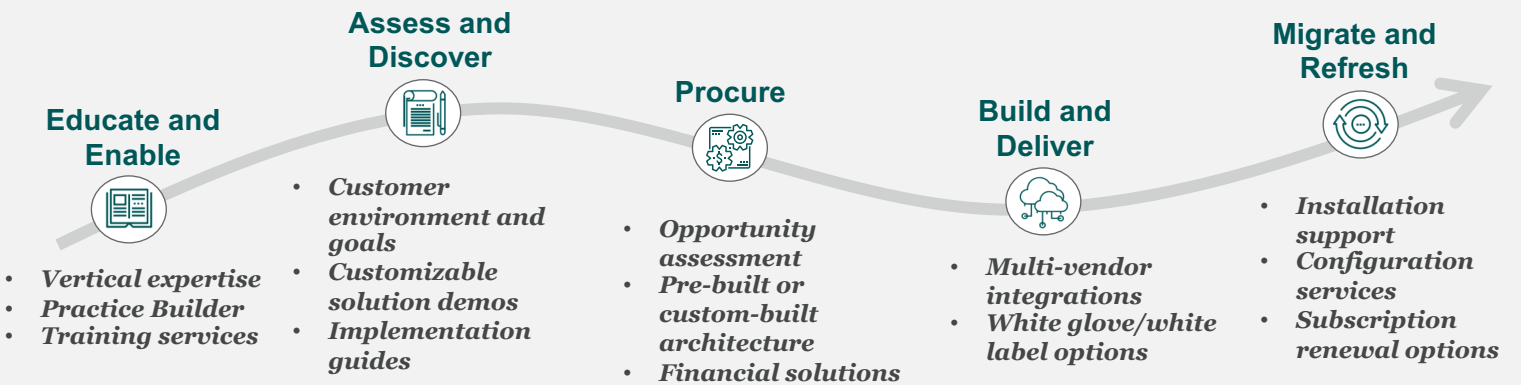

Hybrid Cloud

Elevate, Integrate, Innovate

Problem Solved: Hybrid Cloud Solutions for Every Business Need

Development and Testing
Harness scalability and cost efficiency during peak development cycles while ensuring a secure and controlled environment to accelerate speed to market

Disaster Recovery
Safeguard critical data and applications with a dynamic and scalable backup environment to minimize downtime and ensure resilience

Digital Transformation
Seamlessly integrate new technologies, optimize processes, and accelerate digital initiatives with a future-ready environment

AI Optimization
Achieve peak AI performance with dynamically scaling computing resources while protecting sensitive data and ensuring regulatory standards are met

Resource Utilization
Ensure optimal performance for peak periods and fluctuating workloads with a stable foundation and scalability to accommodate demand

Vendor Partners Powering Hybrid Cloud Potential

Public Cloud — aws, Google, Microsoft, IBM

Hybrid Cloud — redhat READY, NetApp, NUTANIX, veeAM, vmware, ORACLE, COHESITY, HITACHI Inspire the Next

Private Cloud — IBM, CISCO, Hewlett Packard Enterprise, DELL EMC, Lenovo

Build Your Hybrid Cloud Path to Success with TD SYNNEX

Educate and Enable
- *Vertical expertise*
- *Practice Builder*
- *Training services*

Assess and Discover
- *Customer environment and goals*
- *Customizable solution demos*
- *Implementation guides*

Procure
- *Opportunity assessment*
- *Pre-built or custom-built architecture*
- *Financial solutions*

Build and Deliver
- *Multi-vendor integrations*
- *White glove/white label options*

Migrate and Refresh
- *Installation support*
- *Configuration services*
- *Subscription renewal options*
