

Unpaid or Underpaid Insurance Claims:

How Generate Reclaims Revenue and Boosts Efficiency

Generate by Iterate.ai is a private AI Assistant platform designed for enterprises that require data security, compliance and cost efficiency. Built on the Interplay low-code environment, Generate combines GenAI with retrieval-augmented generation (RAG) to deliver secure, scalable AI workflows across on-premises, private cloud and hybrid environments.

Key features:

- **Private large language model (LLM) management:** Securely deploy and manage LLMs.
- **RAG-powered search:** Advanced document and database querying for precise answers.
- **Agentic AI workflows:** Automate complex tasks across enterprise systems.
- **Hardware optimization:** Runs efficiently on Intel® Xeon® processors.
- **Flexible deployment:** Supports on-premises, private cloud and hybrid setups.

Benefits:

- **Data sovereignty and compliance:** Keeps sensitive data local, eliminating exposure to public clouds.
- **Scalable and cost-efficient:** Reduce cloud coverage costs and optimize compute resources.
- **Faster insights:** Instantly summarize documents, answer complex queries and generate reports.
- **Enterprise integration:** Connects with major platforms like Slack, Confluence and Docusign.

Industry and Market Insights

GenAI is redefining workplace efficiency by automating up to 30% of routine tasks, freeing employees to focus on innovation and collaboration. With next-generation optimizations, organizations can achieve up to 25% reduction in processor power consumption while supporting more than 500 AI models for diverse use cases. Iterate Generate delivers scalable, high-performance solutions that accelerate productivity and sustainability — empowering teams to work smarter and drive transformative outcomes.

Use Cases

Healthcare

Streamline insurance claim processes and automate billing workflows.

Partner Revenue Opportunities

- **Claim compliance auditor and revenue erosion tracker:** Partners can position Generate as a turnkey solution for hospitals to **recover lost revenue from underpayments and denials.**
- **Cross-electronic medical record (EMR) compatibility:** Generate integrates seamlessly across disparate EMR systems, eliminating costly interoperability projects.
- **Ongoing AI workflow management:** Provide managed services for workflow updates, compliance audits and performance optimization.

Target Partner Profile

Resellers and integrators serving hospitals seeking to identify unpaid insurance claims. Focus on ready-to-deploy, Intel-optimized offerings for private or hybrid environments.

Conversation Starters With Your Customers

- | | | |
|--|--|---|
| • How much revenue do you think your hospital is leaving on the table today? | • What would it mean for your hospital if claim denial reviews took minutes instead of days? | • Are staffing shortages impacting your ability to chase unpaid claims? |
|--|--|---|
