

Apple Watch lineup

Apple Watch is an essential daily companion, helping customers stay connected, active, healthy, and safe. Every model offers advanced health features like sleep score, which helps customers track and improve their sleep quality. Apple Watch SE 3 gets a major upgrade with wrist temperature sensing, sleep apnea notifications, and retrospective ovulation estimates. Apple Watch Series 11 and Ultra 3 can notify customers of signs of chronic hypertension. The new lineup features fast 5G, and with a cellular model, customers can stay connected even when their iPhone isn't nearby. watchOS 26 introduces a beautiful new look and even more intelligence for a more personalized experience. And with enhanced battery life on Series 11 and Ultra 3 and fast charging on every model, customers can confidently wear Apple Watch through the day and night.

Discover your customers' interests to recommend the Apple Watch that's right for them

Customers interested in Apple Watch may need more information or reassurance before they're ready to buy. Others may already have Apple Watch and are considering upgrading. Let customers know that every Apple Watch model includes breakthrough connectivity, fitness, health, and safety features. Then discover customers' interests to recommend the Apple Watch that's right for them. Here are some customer needs you might discover and benefits you can share.

"I have a basic fitness tracker, but I've heard that Apple Watch can do a lot more."

You discover she enjoys taking long outdoor walks and tracking her steps. She has an iPhone and wants to learn more about Apple Watch, and she's looking for something affordable.

You recommend Apple Watch SE 3

It can help you stay connected

Apple Watch SE 3 offers advanced features at an affordable price. With the Always-On Retina display, you can see the time and notifications without raising your wrist or tapping the display. So it's easy to stay connected to the people and information you care about, whether you're checking messages or answering a phone call. Plus, SE 3 comes with watchOS 26, and you'll love the new design with Liquid Glass, which makes interacting with apps and controls smooth and dynamic.

You can track your activity and health

Activity rings encourage you to move more, sit less, and exercise, and you can use the Workout app to track workouts like walking, running, cycling, and more. You can monitor your heart rate and get notified of high or low heart rates or irregular rhythms.³ The sleep experience on Apple Watch helps you create sleep schedules and track your sleep score, and get notifications of possible sleep apnea.⁷ With temperature sensing⁵ and the Cycle Tracking app, you can track your periods, get period and fertile window notifications, and receive retrospective ovulation estimates.⁸

Do more with Apple Watch

Apple Pay offers an easy and secure way to pay from Apple Watch, so you can buy a bottle of water on a walk without taking out your phone. You can stream music and listen to podcasts from Apple Watch—perfect for long outdoor walks. Apple Watch can also detect if you take a hard fall⁹ or are in a severe crash and automatically contact emergency services and your emergency contacts.¹¹

Personalize Apple Watch to your style

Express yourself with easily customizable watch faces and bands in different colors, styles, and materials.

"I want to upgrade my current Apple Watch."

You discover he has an older Apple Watch and is interested in the design and health features on newer models.

You recommend Apple Watch Series 11

You'll love the design and long battery life

Apple Watch Series 11 is the thinnest Apple Watch, so it's comfortable to wear all day and night. It has an advanced Always-On Retina display, and aluminum models are more durable with a 2x more scratch resistant Ion-X glass. Plus, Series 11 gets up to 24 hours of battery life,² enough for all-day use plus a night of sleep tracking. With fast charging, a 15-minute charge provides up to 8 hours of normal use.²

It offers the most comprehensive health features

Series 11 is the ultimate companion for a healthy life, offering advanced features like blood oxygen,⁴ temperature sensing,⁵ and more. Hypertension notifications can alert you to signs of chronic high blood pressure, a serious condition.⁶ You can even take an ECG and generate a PDF to share with your doctor.³ With the Sleep app, you can create sleep schedules and get a sleep score with insights into the quality of your sleep, and receive sleep apnea notifications.⁷ And with the Vitals app,¹⁴ you can quickly see key overnight health metrics right on your watch—including heart rate, respiratory rate, wrist temperature, sleep duration, and more.

Stay connected with 5G

Series 11 has the latest 5G cellular technology for better performance so music, podcasts and apps download faster. Series 11 also has a new antenna architecture that boosts reception in areas with weak coverage. With a cellular plan on your watch, you can easily receive messages and calls and connect with emergency services, even when your iPhone isn't nearby.¹¹

Control your watch with one-handed gestures

With double tap and wrist flick on Series 11, you control your watch without touching the display. Tap your index finger and thumb together twice to answer or end calls, play or pause music, and more. And wrist flick to dismiss notifications, silence incoming calls, stop timers, snooze alarms, and return to your watch face.

"I'm a runner looking for a sports watch to help with my workouts and training."

You discover he runs every day and wants to see more details about his workouts.

You recommend Apple Watch Ultra 3

It has the most advanced display and longest battery life

Ultra 3 has the largest and brightest Always-On Retina display in the lineup, with up to 3000 nits peak brightness, making it easier to see in bright sunlight. Wide-angle OLEDs emit more light at wider angles, so you can see the display clearly from an angle, even while running. Ultra 3 also has the longest battery life, getting up to 42 hours, or up to 72 hours in Low Power Mode²—enough for a run, marathon, or triathlon. And just 15 minutes of fast-charging provides up to 12 hours of battery life.²

Get advanced running features and metrics and customize your experience

Ultra 3 comes with advanced features like Workout Buddy,¹⁵ Pacer, Race Route, Running Power, and Heart Rate Zone alerts. With precision dual-frequency GPS, Ultra 3 offers the most accurate GPS in a sports watch.¹⁶ You can make informed decisions about when to push or when to recover with training load, which shows the impact of your workouts on your body over time. In addition to metrics like distance, pace, and heart rate, you'll get advanced running form metrics like stride length, ground contact time, and vertical oscillation. With the redesigned Workout app, you can quickly access Custom Workout and Pacer, and even customize the metrics you want to see for each workout type. The customizable Action button also gives you quick access to a variety of functions, like starting a running workout or marking a segment or dropping a Compass waypoint.

Enjoy the freedom to go with just your watch

With an active cellular plan on your watch,¹⁷ you can stay connected with messages or phone calls even when your iPhone isn't nearby. And with the latest 5G cellular technology in Ultra 3, you'll get even better performance, so it's easy to stream music and podcasts on your runs.

Safety features give you peace of mind

With Ultra 3, you can connect to a satellite to contact emergency services, message friends and family,¹⁰ and share your location. Safety features like Fall Detection⁹ and Crash Detection can help connect you to emergency services,¹¹ and an 86-decibel siren can alert others from a radius of up to 180 meters (600 feet) away. If you get lost, Backtrack can help you retrace your steps.

"I love HIIT workouts. Can Apple Watch help me learn more about my recovery?"

You discover he enjoys cardio workouts and wants to track how well his body recovers after exercise. And he's curious about the accuracy of the metrics.

You recommend Apple Watch Series 11

It's the perfect fitness partner

Apple Watch Series 11 motivates you to stay active and you can use it to track all your workouts, from HIIT and running to rowing and tennis. Training load helps you see how the intensity and duration of your workouts may impact your body over time, so you can make an educated decision on when to push or when to recover.

Stay motivated during workouts

Workout Buddy, powered by Apple Intelligence,¹⁵ further enhances the fitness experience by analyzing vast amounts of your fitness data to give you personalized voice motivation during your workout.

Get meaningful health insights

Advanced sensors in Series 11 help you better understand your health. Apple Watch can notify you of high and low heart rates and irregular heart rhythms that may be suggestive of atrial fibrillation (AFib).³ You can even take an ECG.³ You can also check your blood oxygen⁴ and be notified of signs of chronic high blood pressure.⁶ The Sleep app analyzes your sleep to provide a sleep score to help you understand your quality of sleep and how to make it restorative. It can even notify you of consistent signs of sleep apnea over multiple nights.⁷ With the Vitals app,¹⁴ you can quickly check your daily health status and see key overnight health metrics right on your wrist—including heart rate, respiratory rate, wrist temperature, sleep duration, and more.

Innovations are grounded in science

From heart health to sleep to hearing, all Apple health features are scientifically validated and developed in collaboration with clinical experts to provide meaningful insights.

It has a thin, durable design and long battery life

Series 11 is lightweight and the thinnest Apple Watch, so it's comfortable to wear all day and night. Plus, it has long battery life of up to 24 hours,² and with fast charging, a 15-minute charge provides up to 8 hours of normal use.²

“Can Apple Watch help my mom monitor her heart health and sleep?”

You discover their mom lives alone, and they're concerned about her health and wellbeing.

You recommend Apple Watch Series 11

It offers advanced health features

Apple Watch tracks your mom's health automatically, so it's easy to get insights into her health and wellness. She can be notified of high and low heart rates and irregular heart rhythms that may be suggestive of atrial fibrillation (AFib).³ She can also take an ECG³ and generate a PDF to share with her doctor. She can even receive hypertension notifications of possible chronic high blood pressure.

She'll get insights into her sleep

When your mom wears Apple Watch to bed, the Sleep app can automatically analyze her sleep. She can get a sleep score with a classification and breakdown of the most critical components, like sleep duration and interruptions, so she can understand the quality of her sleep and how to make it more restorative. Apple Watch can also notify her if consistent signs of moderate to severe sleep apnea are detected.⁷

It's easy to track her medications

Your mom can manage the medications, vitamins, and supplements she takes in the Health app on her iPhone or iPad. The Medications app on Apple Watch can even remind her when it's time to log her medications.

She can share her health data with you

With Health Sharing, your mom can choose to securely share her health data with you, and you can see her metrics in the Health app on your iPhone or iPad. You can also be notified of any significant changes in her metrics. Health Sharing is designed with privacy in mind, so your mom can choose what to share and can stop sharing anytime.

You'll both enjoy peace of mind

With Fall Detection,⁹ Crash Detection, and Emergency SOS¹¹ on your mom's watch, emergency services will be alerted if a hard fall or car crash is detected. With a cellular Apple Watch, emergency services will be contacted even if your mom isn't near her iPhone.¹⁷ As an emergency contact, you'll also be notified. Your mom can even set up a Medical ID to provide information that may be important to first responders in an emergency, like allergies and medical conditions.

“I want a smartwatch I can use on my hiking adventures and at the office.”

You discover he wants an Apple Watch that's durable enough for hiking and trekking, but also stylish enough to wear to work.

You recommend Apple Watch Ultra 3

It's durable enough for all your adventures

Apple Watch Ultra 3 is made from 100 percent recycled aerospace-grade titanium and features a flat sapphire crystal display for enhanced durability and scratch resistance. And it has the widest operating altitude and temperature of any Apple product,¹ making it perfect for hiking and summiting peaks in all conditions.

Get the most advanced display and longest battery life

Ultra 3 has the largest and brightest display of any Apple Watch, with up to 3000 of nits brightness, so it's easier to read even under bright sunlight when you're out hiking. And it gets up to 42 hours of battery life or up to 72 hours in Low Power Mode.² Fast charging for 15 minutes provides up to 12 hours of battery life.²

It's the perfect hiking companion

You can start a hiking workout in the Workout app and track metrics like pace, distance, elevation gain, and more. On iPhone, you can create and save custom walking and hiking routes with just a few taps. On Apple Watch, you'll get turn-by-turn directions, and you can even download the routes to Apple Watch to use without your iPhone. With the Compass app, you can easily add waypoints for places of interest, like the trailhead or your campsite. And Backtrack can automatically track your route when you're off the grid, so you can retrace your steps in case you get lost.

Enjoy peace of mind with the most advanced safety features

With Ultra 3, you can connect to a satellite to contact emergency services, message friends and family,¹⁰ and share your location. Safety features like Fall Detection⁹ and Crash Detection can help connect you to emergency services if a hard fall or crash is detected.¹¹ You can even alert others to your location with an 86-decibel siren that can be heard from a radius of up to 180 meters (up to 600 feet) away.

Take it from the campsite to the office

Personalize your watch with dozens of customizable faces and bands in different colors, styles, and materials. Ultra 3 is designed to be a master multitasker, transitioning effortlessly from sports watch to smartwatch. From the campsite to work or scuba diving to dinner, Ultra 3 has the design and features to do it all.

“I see a lot of people wearing Apple Watch at the gym. How can it help me stay more active and healthy?”

You discover she enjoys yoga, dance, and cardio workouts. She's never had a smartwatch before, and she's on a budget.

You recommend Apple Watch SE 3

It encourages you to stay active

Activity rings motivate you to move, stand, and exercise during your day. You can customize your goals, earn awards, and even compete with friends. Plus, you can track all your workouts, and see detailed metrics like calories burned and heart rate throughout your workout. Workout Buddy, powered by Apple Intelligence,¹⁵ can even give you a pep talk while you work out.

Tune into your favorite music while working out

Connect AirPods to your Apple Watch and listen to your favorite music for extra motivation. With access to media right in the Workout app, you can have your music automatically start playing every time you start a specific workout. Apple Music can choose the best playlist based on your workout type and the music you like to listen to, or you can choose from a list of suggested playlists or podcasts, based on what you've been listening to during that particular workout type.¹⁸

Easily track your health and wellness

Apple Watch monitors your heart rate and can notify you if it detects a low or high heart rate or irregular rhythm.³ With the sleep experience on Apple Watch, you can create sleep schedules to meet your sleep goals and get your sleep score, and receive sleep apnea notifications.⁷ And with temperature sensing⁵ and the Cycle Tracking app,⁹ you can easily track your periods and get upcoming period notifications and retrospective ovulation estimates.

It will last through your day

Even with its advanced features, Apple Watch SE 3 gets up to 18 hours of battery life,² enough to last all day. With fast charging, you can get up to 8 hours of battery life with just a 15-minute charge, and up to 8 hours of sleep tracking with just an 8-minute charge.² So you can top off your battery while you take a shower in the morning or drink a cup of coffee.

“I'm looking to replace my Apple Watch, and I want the longest battery life.”

You discover she's ready to upgrade from her Apple Watch Series 9. She loves taking adventure vacations and using Apple Watch to track her activities. So long battery life is important to her.

You recommend Apple Watch Ultra 3

It has the largest, most advanced display

Ultra 3 has the largest, brightest, and most advanced Always-On Retina display in the lineup. So you'll get more active screen area than on your current Apple Watch, and the screen is even easier to see in bright sunlight. Plus, wide-angle OLEDs emit more light at wider angles, so the display is even brighter when viewed from an angle.

You'll love the amazing battery life

Ultra 3 has the longest battery life of any Apple Watch in the lineup—up to 42 hours or up to 72 hours in Low Power Mode,² enough to last through your travels. When you're on the go, Ultra 3 even supports fast charging. A 15-minute charge provides up to 12 hours of battery life, and you can get up to 80 percent battery in about 45 minutes of charging.²

Track your activities and more

Apple Watch Ultra 3 is built for extremes, so it's ideal for wherever your adventures take you. It has 100M water resistance, a water temperature sensor, and EN13319 certification, making it perfect for recreational scuba diving to 40 meters, swimming, and other water activities. With precision dual-frequency GPS, Ultra 3 offers the most accurate GPS in a sports watch.¹⁶ And it has the widest operating altitude and temperature of any Apple product,¹ so it's perfect for sports and adventures in all conditions. The customizable Action button gives you quick access to a variety of functions, like dropping a Compass waypoint, turning on Flashlight, and more.

Get the freedom to go with just your watch

With an active cellular plan on your watch,¹⁷ you can stay connected with messages or phone calls even when your iPhone isn't nearby. The latest 5G cellular technology on Ultra 3 makes it easy to stream music and podcasts on the go. You can also connect to a satellite to contact emergency services, message friends and family,¹⁰ and share your location.

“My son isn’t ready for an iPhone, but I need to be able to reach him.”

You discover he wants to be able to reach his son after school, but he’s not ready to buy him an iPhone yet.

You recommend Apple Watch SE 3

You can manage Apple Watch for your son

With Apple Watch For Your Kids,¹³ you can use your iPhone to set up and manage a cellular Apple Watch for your son. He can enjoy all the convenience and benefits of Apple Watch, like the Activity app, Maps, Photos, and more, without his own iPhone. You can monitor his activity with Screen Time and use Schooltime to limit features at specific times of the day, like during school hours. You can also manage contacts so he can communicate with the people you specify.

It’s easy to stay connected

With an active cellular plan on his watch,¹⁷ your son will have his own mobile number and Apple Account so he can make and receive calls and texts with the contacts you approve. With Location Sharing, you can receive alerts when your son arrives or leaves a location, or when he’s not where he’s expected to be.

You’ll love the durability

With tougher Ion-X glass in the display, the front glass of SE 3 is 4x more resistant to cracks than before, so it’s ideal for active children. And with AppleCare+ for Apple Watch, you won’t have to worry about expensive repairs if his watch gets damaged.

He’ll get motivation to stay active

Apple Watch SE 3 encourages your son to stay active. Activity rings and the Workout app have been specifically tuned for kids. Your son can even share his activity with family and friends for a little competition.

You’ll have peace of mind as your child gains independence

You’ll have peace of mind knowing that with Emergency SOS¹¹ on his wrist, your son can access emergency services if he needs them. Emergency services can also view Medical ID on his Apple Watch and immediately access his emergency contacts, allergies, and current medications.

Not all features are available in all regions or languages. ¹ Tested against subsections for Altitude, High Temperature, Low Temperature, Temperature Shock, Immersion, Freeze/Thaw, Shock, and Vibration. ² Battery life varies by use and configuration. Charge time varies with region, settings, and environmental factors; actual results will vary. See apple.com/batteries for more information. ³ The ECG app is available on Apple Watch Series 4 or later (not including Apple Watch SE), and the irregular rhythm notification feature is available on Apple Watch Series 3 or later. The ECG app and the irregular rhythm notification feature are not intended for use by people under 22 years old. The irregular rhythm notification feature is not designed for people who have been previously diagnosed with Afib. See apple.com/watch for compatibility details. ⁴ Blood Oxygen app is for wellness purposes only and not for medical use. ⁵ The temperature sensing feature isn’t intended for medical use. ⁶ The hypertension notification feature is pending FDA clearance and expected to be available in September 2025 in over 150 countries and regions around the world, including the U.S. and Europe. ⁷ The Sleep Apnea Notification Feature is intended to detect signs of moderate to severe sleep apnea for people 18 years old or older without a diagnosis of sleep apnea. ⁸ The Cycle Tracking app shouldn’t be used for birth control or to diagnose a health condition. ⁹ Fall Detection updates are available on Apple Watch Series 4 and later with watchOS 8 and later. ¹⁰ Messages via satellite requires an active carrier plan and not all carriers support SMS via satellite. Send SMS messages over satellite as long as your phone is on the grid. ¹¹ Emergency SOS requires a cellular connection or Wi-Fi calling with an internet connection from your Apple Watch or nearby iPhone. The international emergency calling feature requires an Apple Watch Series 5 with cellular or later. For a list of supported countries and regions, see apple.com/watchos/feature-availability. ¹² International roaming requires a cellular model of Apple Watch Series 5 or later. International roaming coverage is determined by your carrier. Please check with your carrier for details. For a list of supported carriers, see apple.com/watch/cellular. ¹³ Not all features will be available if the Apple Watch is set up through Apple Watch For Your Kids. Check support.apple.com/en-us/109036 for details. Wireless service plan required for cellular service. Check apple.com/watch/cellular for participating wireless carriers and eligibility. ¹⁴ The Vitals app is for wellness purposes only and not for medical use. ¹⁵ Requires an Apple Intelligence-enabled iPhone nearby and Bluetooth headphones with device and Siri language set to English. Apple Intelligence is available in beta. Some features may not be available in all regions or languages. For feature and language availability and system requirements, see support.apple.com/121115. ¹⁶ GPS performance was evaluated based on route map accuracy in challenging urban environments for outdoor running and walking workouts. Comparison made against industry leading dual-frequency GPS sports watches commercially available at the time of testing in August 2025. ¹⁷ Wireless service plan required for cellular service. Check apple.com/watch/cellular for participating wireless carriers and eligibility. ¹⁸ An Apple Music subscription is required for automatic music selection.
