

NEW Brother Enterprise Color Laser Printers Ideal for Mid to Large-Sized Workgroups

As a higher product category than the current Brother business color lasers, these new enterprise color laser printers and all-in-ones provide a complete range of A4 products to help meet your customers' needs.

Demand for color laser printing continues to grow, and this expansion opens the door to the enterprise market with color laser units offered at a lower price when compared to competitive devices. These devices fulfill higher page volumes and printing requirements for enterprise end users and meet both end customer and channel requirements for low-cost, enterprise-level color laser printing.

KEY FEATURES

Low total cost of ownership with high in-box and replacement toner yields

Bold color and sharp black output for professional results

Large, scalable input and output paper capacity

Fast print and scan speeds with advanced workflow features

Flexible connectivity options including mobile device printing¹

Easy to deploy, manage, and use

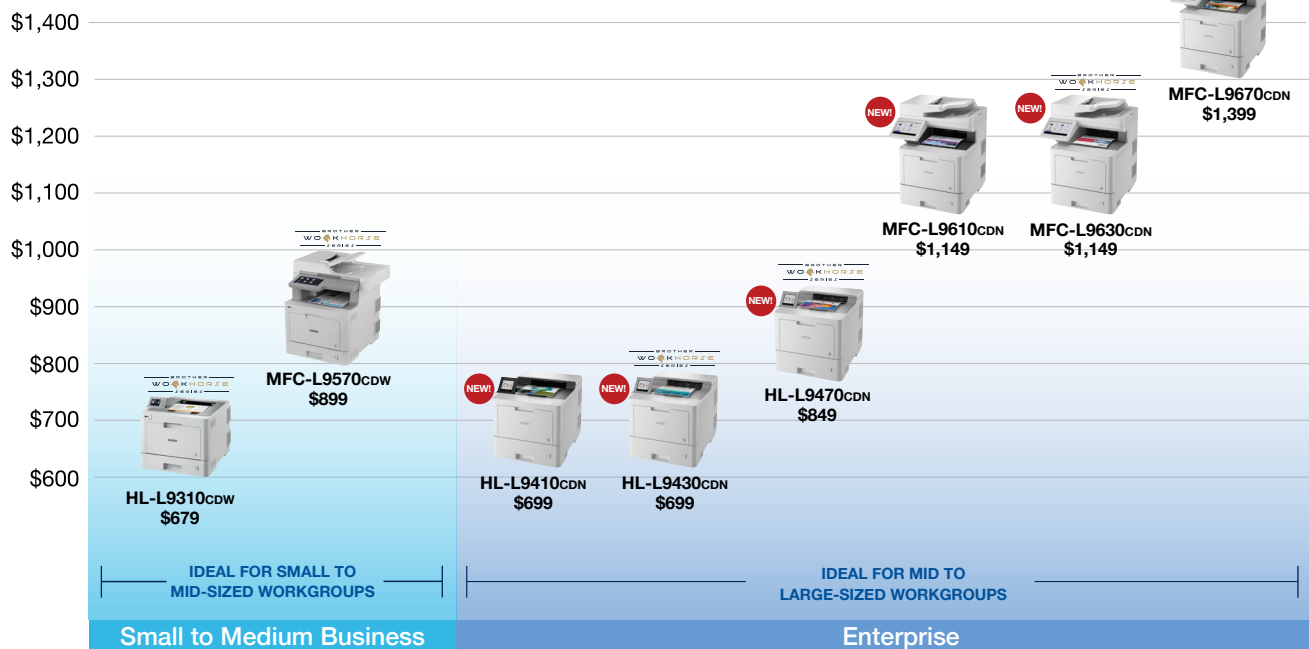

Brother enterprise color laser devices are equipped with Triple Layer Security features and have met strict security requirements of Keypoint Intelligence-Buyers Lab
