

## Harmony Email & Collaboration Security Awareness Training

Phishing scams are among the most common form of cyber crime. These scams are designed to manipulate employees and to provide cyber criminals with access to information, systems or monetary funds. Employee education can significantly reduce phishing-related risks.

However, 41% of businesses report challenges around building and maintaining effective security awareness programs.<sup>1</sup>

### HEC's Security Awareness Training

Via engaging and interactive content, our Security Awareness Training (SAT) program is designed to empower employees with essential cybersecurity skills.

The primary objective is to teach employees how to recognize phishing emails and their malicious components – including suspicious links, suspicious sender addresses and unusual language. In turn, employees will be able to assist in preventing malicious attacks and keeping your organization safe.

Our SAT program also aims to simplify training for security leaders – creating a one-stop shop with automated functions that make security training seamless.

### Key Differentiators

The SAT program includes a comprehensive content library and a wide array of training modules, which cover various aspects of cybersecurity awareness. The modules are concise and include animated videos, case studies and quizzes, as to boost engagement and information retention.

Organizations can customize the training to fit their specific industry, employee-base and security needs. The program leverages generative AI help personalize content, ensuring that learning addresses specific vulnerabilities.

Organizations with consistent cybersecurity and awareness programs commonly experience a 70% reduction in security-related incidents.<sup>2</sup>

<sup>2</sup> Importance of Cybersecurity Awareness Training For Employees in Business, ResearchGate, Dawit Negussie, August, 2023

The program is designed to be low-maintenance, with automated ongoing management that assigns training automatically. In turn, organizations do not have to spend time manually matching users with trainings and sending them out. Limited manual operation is involved.

Meet compulsory regulatory and compliance mandates through security awareness training. Providing your employees with relevant training will reduce the probability of human error, which is responsible for a significant number of security breaches.

Check Point's Harmony Email & Collaboration SAT offering includes robust monitoring and reporting features. Admins can track user progress and identify areas where additional training may be beneficial.
