

# Catalyst Switches for SMB

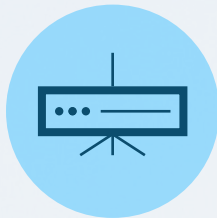

Cisco® Catalyst 1200 and 1300 Series Switches are fixed configuration, Layer 2 and Layer 3 access switches that provide enterprise-class connectivity for small and medium-sized businesses, retail, hospitality, and branch offices. They are built on fast and secure hardware with Linux based OS software with no license or subscription to purchase. They support simple device management as well as network management using Cisco Business Dashboard.

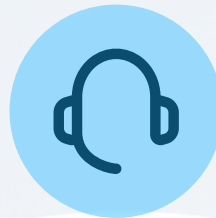

Trustworthy Solution with Cisco Trust Protection Module (TPM) chip installed on the switch helps protect the hardware from illegal upgrade, product manipulation, license bypass, device spoofing, and credential theft.

Provide simplicity, flexibility, built on fast and secure hardware, 2x the CPU speed and 4x the memory from previous generation (CBS switches).

Offers a wide range of Power over Ethernet (PoE) options, port combinations and stacking, make them flexible to your business needs.

Limited lifetime warranty with return to factory replacement, complementary 1-year phone and online chat.

Offers up to 50%\* power saving from previous generation (CBS and C1000, model specific)

Requires no license to purchase or subscriptions, offers software updates at no additional cost.
