

# ConnectSolv™

## Explore Everything ConnectSolv Can Offer!

ConnectSolv provides a complete portfolio of connected solutions with hardware, network access, application-layer solutions and a full suite of support services. We combine a diverse set of technologies to deliver best-in-class business outcomes.

ConnectSolv brings together 5G connectivity, carrier services and enterprise collaboration solutions like UCaaS, CCaaS, CPaaS, SD-WAN and edge computing to build solutions tailored to each partner's use case. Our products allow customers to increase their margins and earn recurring revenue, all while diversifying their portfolio and growing their business footprint.
