

Simplifying Integrations with the Tools You Use.

Digital Bridge streamlines how thousands of TD SYNnex partners, from emerging MSPs to enterprise customers, connect, automate, and grow. Pre-built connectors and enterprise-grade APIs surface live pricing, inventory, and order workflows inside the systems you already rely on.

Connector Bridge Your Hub for TD SYNnex Integrations

Connector Bridge is Digital Bridge's marketplace for TD SYNnex-built and third-party integrations. Connect in seconds, enable the integration templates you need, and manage the integration with activity logs. Credentials never leave the TD SYNnex security perimeter, giving you no-code activation with enterprise-grade control.

Key Benefits You Can Expect

Easily Connect
Launch pre-built connectors in minutes - no dev sprint, no custom code.

Real-Time Data
Instantly view inventory, pricing, and order status to make fast, informed decisions.

Automate Tasks
Trigger POs, sync shipping, and invoice data automatically - hands-free.

Built to Extend
Build on TD SYNnex APIs, or use low-code/no-code tools like Make.com and Zapier.

TD SYNnex Built Connectors

Flagship connectors, engineered and managed entirely by TD SYNnex IT - distinctly developed in-house, not a generic white-label solution. Activate with confidence, knowing the same experts who build these integrations also secure and support them for the long haul.
