Teams AI Agent

A destination to access real-time vendor intelligence inside every customer conversation.

Real-time
Customer Intelligence

The AI Agent for Microsoft Teams is part of TD SYNNEX Digital Bridge, delivering vendor and distribution intelligence right where you communicate with end customers. With a simple click, you can unlock real-time pricing, availability, order status, and program information —all inside the chat window. No portals, no delays. Just immediate answers when and where they matter most.

Key Outcomes

Answer Instantly
Turn customer chats into action by accessing live vendor data at the exact point of communication.

Real-Time Data
View pricing, specs, inventory, and order details instantly - so you can respond with confidence.

Quote Instantly
Paste multiple part numbers or an order ID and return structured, adaptive responses ready to share back immediately.

Gain an Advantage
Win trust, accelerate decisions, and close faster by delivering accurate information without leaving Teams.

Activate With Confidence

Built and managed by the same experts who engineer TD SYNNEX connectors, ensuring enterprise-grade reliability, data accuracy, and long-term support.
