Level 3	50+	68%	

**Pricing set by Distribution*

KEY QUESTIONS:

1. Are you looking to reduce complexity and consolidate the number of vendors that make up your cybersecurity defenses? *With Fortinet, you get a solution and platform-based approach allowing you simplify your deployment and shrink your attack surface, PLUS consolidate management of your entire deployment with a single management interface*
2. Are you concerned about your security effectiveness and posture? *Fortinet firewalls are the most deployed and most trusted firewalls in the world.*
3. With attacks happening at the speed of light, does your current solution allow for automated remediation enabling you to take a more hands-off approach? This could be the difference between safety and a disaster!
4. Does your current firewall allow for SSL inspection of all traffic? If not, malware is likely sailing through your current firewall, exposing you to all known and unknown threats! *Fortinet's custom ASICs are designed for real-time SSL inspection – offering speeds up to 10x the competition, and more importantly protecting you from anything harmful that may be inbound!*

HOW TO WIN AGAINST THE COMPETITION:

- Demo the value of the security capabilities & the Security Fabric
- Explain and show how Fortinet firewalls have a much greater security effectiveness than the competition
- Protect against all known and unknown threats - FortiGuard Labs' suite of AI-powered Security Services—natively integrated with your NGFW
- Real-time SSL inspection (including TLS 1.3) provides full visibility into users, devices, & applications across the attack surface.
- Zero Touch Flexible Provisioning/Deployment and Management reduces costs and complexity
- Universal ZTNA for control access to applications with FortiClient and EMS
- Gartner leader & NSS labs recommended for Secure SD-WAN

WHY FORTINET?

- We are a Cybersecurity company providing real-time protection in a hybrid approach for on premise, VM, and the cloud.
- We have a consolidation approach with security and networking to reduce the complexities for our customers.
- The Fortinet Security Fabric delivers better security integration and capabilities with our products for our customers
