Logged-in users	✓	✓		

Chrome Enterprise Upgrade Capabilities

Drop ship devices

Dropshipdevicesdirectly to employees ready to be signed in with zero-touch enrollment. It's a simple 3-step process:

Buy
Purchase device from service partner.

Ship
Device is drop shipped directly to the user.

Ready to use!
Device automatically enrolls into the domain, and syncs employee's policies, settings, and apps.

Advanced security

Lost and stolen prevention
Stop data theft by remotely disabling devices that have been lost or stolen.

Persistent enrollment
Ensure devices are enrolled in management, even if the device is factory reset.

Application verified access
Allow third-party applications to understand the managed state of a device as a requirement to provide a service.

Login controls
Block employees from logging into managed ChromeOS devices with unauthorized accounts.

Ephemeral mode
Guarantee user data is wiped from the device upon session log out.

Granular device controls

Enable and disable device policies
Enable and disable device policies, or keep the policies set to preset defaults with confidence.

Configure local and network printers
Configure user and printer settings, including adding and removing printers for all users or specific groups.

Set up networks and proxies
Set up Wi-Fi and VPN networks, ethernet, and network certificates for managed devices enrolled in your organization.

Manage client certificates
Manage and provision user and device certificates for authentication of internal web resources.

Control OS and feature updates
Choose to roll out updates gradually or automatically with the added option for the long-term support (LTS) channel.

Reporting and insights

Device reporting and insights

Analyze reports of your ChromeOS devices to gather valuable fleet and usage information. Report types include:

- 7-day active metrics: Shows the unique ChromeOS devices your user has signed into within the past week.

- Boot mode: Shows boot mode for your devices.

- Devices count by version: Shows the number of devices running a version of ChromeOS. Device release channel: Shows release channel of your current devices.

- OS version policy compliance: Shows whether the device OS version is in compliance with the OS specified by your organization's policy.

- Auto expiration (AUE) report: Shows the number of devices expiring in each month of the selected time frame.

Export your report data

Export your report data to a Google Sheet or download it as a CSV file.

Scalable, cloud-based management

Google Admin console

Use the Google Admin console to set over 500+ policies, including accessibility controls, network file shares, print controls, auto-update settings, guest sessions, and more.

Native Azure AD integration

Provide end users with a familiar login experience that integrates directly with existing Active Directory infrastructure.1

Advanced SAML SSO

Enable end users to seamlessly log into their device and applications with SAML SSO integration.

Third-party UEM

Set policies and remotely orchestrate your devices with industry-leading UEM providers.2

Chrome Policy API

Manage Chrome policies at scale with custom scripts using the Chrome Policy API.

Chrome Management Telemetry API

Monitor the operation and health of ChromeOS devices using the Chrome Management Telemetry API.
