Product

AKULAR Platform allows users to visualize data, documents and simulations geo-tagged on their BIM model, making design, construction and operations processes visible and manageable.

Solution Description

AKULAR is a one-stop-shop to make your BIM model the single source of truth for all data through all stages of project's life-cycle.

Common Pain Points Addressed

Communication misunderstandings

Inefficient workforce and documentation management

Extensive construction rework

Issues around operation & maintenance management (energy savings monitoring, hazard detection, maintenance and equipment tracking)

Value Proposition

Making your BIM the single source of truth for data generated by a wide variety of sources anytime and everywhere.

Industries

AEC industry

Real Estate Industry

Public sector

Target Buyer

Construction management companies

Real estate developers, owners and operators

Engineering companies

State and local public entities
