

# Azure Virtual Desktop

Enable secure remote work for your customers with built-in security and simple management.

## Empower your customers' modern workforce

### Azure Virtual Desktop overview

Azure Virtual Desktop is a desktop and app virtualization service that runs on the cloud and enables secure, flexible work environments for remote workers.

- Deploy customized virtual multi-session Windows 10 and Windows 11 environments.
- Increase remote work security with built-in network security and identity management.
- Provide Microsoft 365 apps.

### Azure Virtual Desktop benefits

Enable secure remote work for your customers. Give them a personalized user experience that's simple to manage. Deliver their Windows 10 and Windows 11 desktops and work applications anywhere, on any device.\*

**Enable secure remote work** with built-in network security, identity management, and data protection.

**Create personalized work environments** to allow employees to work in a way that fits their unique style.

**Deliver a great user experience** with Windows 10 and Windows 11 native on virtualized desktops. Provide a seamless connection to Microsoft 365 apps.

### Opportunities and use cases

- Support or transition to a remote or hybrid workforce.
- Increase security for remote work by safeguarding sensitive business data in the cloud.
- Give remote desktop service (RDS) customers a more modern experience.
- Sell AVD + Surface and provide a fully managed desktop as a service offering that's packaged with hardware.

# 74%

U.S. companies are using or plan to implement a permanent hybrid work model<sup>1</sup>

# 70%

Increase in spending on the desktop-as-a-service market between 2019 and 2020, which will double again by 2025.<sup>2</sup>

### Meet your customers' needs for:

**Stronger security.** Having users with multiple credentials can lead to vulnerabilities. AVD solves this issue, and it enables employees to securely share resources outside the corporate firewall.

**Better productivity.** Avoid delays caused by forgotten passwords and separate sign on to each app, to improve workflow for local and remote employees.

**Easier management.** Support a remote workforce, eliminate time-consuming requests for password reset, and standardize identity management.

### Azure Virtual Desktop + Surface

Provide fully managed and secure out of the box solutions for your customers. Surface + AVD gives customers a fully managed desktop-as-a-service package with hardware.

# Microsoft 365 Business Premium + Azure Virtual Desktop

Enhance productivity and enable secure remote work for your customers

## Empower your customers' modern workforce

### Microsoft 365 Business Premium

Microsoft 365 Business Premium is a **cost-effective productivity solution** for **secure remote and on-site work**, featuring online meetings, real-time collaboration, and security solutions for your customers.

- It's an all-in-one solution for collaboration, communication, and security, that's easy to use.
- Helps reduce the risk of costly damage from cyberthreats such as phishing, viruses, and ransomware attacks.
- It's less expensive and easier to manage than a comparable collection of third-party products.

**Security for remote work.** Overcome vulnerabilities arising from users with multiple credentials. Enable employees to securely share resources outside the corporate firewall.

**Better productivity.** Avoid delays caused by forgotten passwords and separate sign on to each app, to improve workflow for local and remote employees.

### Azure Virtual Desktop

Azure Virtual Desktop is a desktop and app virtualization service that runs on the cloud and enables secure, flexible work environments for remote workers.

- Deploy customized virtual multi-session Windows 10 and Windows 11 environments; customers pay only for what they use.
- Increase remote work security with built-in network security and identity management.

**Cost optimization.** Make the most of your customers' existing Microsoft 365 Business Premium subscription. Provide the best price on Windows 10 and Windows 11 with multi-session from Azure Virtual Desktop.

**The Microsoft 365 Business Premium license covers licensing requirements for Azure Virtual Desktop. Your customer will only pay for the Azure infrastructure.**

### Azure Virtual Desktop benefits:

Enable secure remote work for your customers. Give them a personalized user experience that's simple to manage. Deliver their Windows 10 or Windows 11 desktops and work applications anywhere, on any device.\*

**Provide seamless integration** with customers' existing Microsoft 365 Business Premium apps, services, and security.

**Enable secure remote work** with built in network security, identity management, and data protection.

**Create personalized work environments** to allow employees to work in a way that fits their unique style.

**Deliver a great user experience** with Windows 10 and Windows 11 native on virtualized desktops. Give customers the ability to use their favorite qualified device.
