Working remotely has always been our strength

FREE virtual customer power review

This is an exclusive offer from Eaton - \$1,500 value

Scope of work

The way we work may have changed for the time being, but there's a reason it's called an *uninterruptible* power supply. Eaton continues to offer free customer power reviews, conducted virtually with mobile devices. By taking travel time out of the mix, this may enable you to schedule even more!

- ✓ Virtual assessment to identify the current UPS and TVSS strategy and deployment
- ✓ Map electrical infrastructure primary and sub-panel capability for utilization in future power implementation
- ✓ Provide load calculation assistance with use of customer-supplied equipment lists or by reviewing equipment load information
- ✓ Review new UPS technologies and how to effectively and efficiently implement at user location based on the information obtained
- ✓ Discuss the benefits and the methods of obtaining branch circuit monitored information from the critical loads
- ✓ Detailed discussion on connectivity methods to effectively manage UPS products
- ✓ Detailed hardware submittal information and custom quote
- ✓ Continued technical support for pre-sale and post-sale support on quoted project

Virtual power review will be scheduled after a discovery conference call with Eaton.

To request a free virtual customer power review, please contact:
