
RenewSolv™

TD SYNEX RenewSolv Delivers

TD SYNEX RenewSolv is a free value add, online add tool available for our partners. With RenewSolv automation, we deliver automated quotes and opportunities throughout the product lifecycle. RenewSolv simplifies the process of selling services, warranties and renewals directly to their RenewSolv dashboard. These are hot leads for our resellers. RenewSolv automation provides a proactive sales motion so resellers can reach more customers and focus on closing sales.

With the launch of RenewSolv 2.0, we separated the opportunity types making it simple, faster and even easier for our reseller partners to access, download and offer quotes to their customers.

RENEW Solv 2.0 delivers the following additional benefits:

- Quick access to your quotes with two easy clicks of your mouse
- Enhanced download and advanced search features
- Separation of service attach opportunities from renewals
- A new feature in RenewSolv - “Load Your Opportunity” allows our resellers partners to load any of their expiring data, schedule notification dates and keep track of all their renewal opportunities.
- For vendor partners, a “Quick Load” feature allowing us to quickly load expiring data and set notification dates. The Quick Load tool delivers proactive opportunity leads to the resellers RenewSolv dashboard. Resellers will receive notifications on expiring opportunities and have direct access to all of the data in their dashboard.

2023 Vendor Spotlight:

Gain access to recurring revenue opportunities from leading IT vendors
