

Data Center Services

End-to-end support for designing, deploying and maintaining data center solutions

Designing and delivering solutions for the **modern data center** often means navigating technology complexities that affect time to market, inventory strategies and customer experience.

Across on-premise, hybrid or high-performance computing (HPC) environments, TD SYNEX Services helps channel partners move from solution design to deployment to ongoing maintenance with **scale, inventory flexibility** and **reduced complexity**.

Business Outcomes You Can Trust

Whether optimizing, modernizing or managing data center environments, TD SYNEX Services supports channel partners in **maximizing solution performance and continuity** while also **protecting the overall customer experience**.

Accelerate delivery and time to value with validated solutions

Maximize ROI with engineering support at scale

Enable smarter planning and inventory management

Ensure multi-vendor and platform operational compatibility

Reduce capital expenses by plugging into existing infrastructure

Key Services Capabilities

Whether it's integration or ongoing support, TD SYNnex Services has you **covered**.

Integration and Configuration

Expert configuration, integration, imaging, testing and validation services to ensure your solutions work seamlessly across complex, multi-vendor environments

Installation and Cabling

Scalable and efficient solutions from basic "rack and stack" services to advanced deployments and rollouts

Maintenance and Break-Fix

24x7x365 L1/L2 technical support, smart hands troubleshooting and helpdesk operations with white-label options to minimize downtime

Managed Services and Support

Ongoing remote monitoring services to proactively identify and quickly resolve issues for optimal performance

Security and Vulnerability Assessments

Services that evaluate overall security posture, compliance gaps and risk levels to help organizations make informed decisions

Data Center Moves

End-to-end support to securely and efficiently relocate data center environments
