

Security Services

Protect customer environments,
reduce risk and respond confidently

Navigating increasingly complex and expanding IT environments can overwhelm **even the most prepared teams**.

From data breaches and phishing attacks to compliance pressures and operational disruptions, businesses must **protect critical data, systems and users** across on-premise, cloud and hybrid infrastructures — often with limited internal resources.

TD SYNnex Services helps channel partners address these challenges with **dedicated** technical resources and **expert-led** security solutions, enabling **scalable, recurring** services revenue.

Business Outcomes You Can Trust

Through a wide range of security capabilities from assessments to ongoing management, TD SYNnex Services supports partners in delivering **trusted** security outcomes through **strategic** consulting and managed services projects — all without significant investment in new infrastructure.

Key Services Capabilities

From vulnerability assessments to asset disposal, TD SYNEX Services has you **covered**.

Vulnerability Assessments

Identify security weaknesses across systems, applications and networks through vulnerability and penetration testing to reduce exposure and prioritize remediation efforts.

Security and Risk Assessments

Evaluate overall security posture, compliance gaps and risk levels to help organizations make informed decisions.

Network Operations Center (NOC)

Provide continuous monitoring and management of network infrastructure to ensure availability, performance and stability.

Security Operations Center (SOC)

Deliver 24x7 security monitoring, threat detection and incident analysis to rapidly identify and respond to cyber threats.

Managed Security Information and Event Management (SIEM)

Centralize security event monitoring, correlation and alerting to improve visibility and accelerate response times.

Incident Response Services

Support rapid containment, investigation and recovery in the event of a security incident or breach.

Asset Disposal and Data Destruction

Ensure secure and compliant end-of-life handling of IT assets to protect sensitive data and meeting regulatory requirements.
