Strategic approach to Federal requirements

1. Compliance table stakes (FISMA-Ready)
2. MCSP for most SaaS products
3. Boundary alignment for rapid FedRAMP Authorization

How does a FedRAMP ATO apply to an individual service?

1. Each agency must grant their own FedRAMP ATO, but they prefer if another agency has already done it before.
2. FedRAMP ATO is granted for a boundary/authorization scope not an individual service.
3. SCN is used to add additional products to the boundary/scope.
