Empower every identity across your ecosystem

In today's digital world, trust and agility are essential. Thales IAM empowers organizations to secure every digital identity - customers, partners, and employees - while streamlining access and reducing risk. Our unified approach simplifies IT complexity, ensures compliance, and delivers seamless digital experiences, so you can focus on growth with confidence.

At Thales, we understand that every user group has its own priorities and challenges. That's why our solutions are designed so customers and partners can connect and collaborate securely and effortlessly – without friction or compromise.

Customer Identity & Access Management

Step into your customers' shoes, ready to buy or sign up, facing zero friction.

They tap their phone, log in effortlessly with biometric authentication, and breeze through checkout without a hitch. Behind the scenes, silent security systems keep threats away while respecting privacy - so every interaction feels smooth, safe, and personal. Millions can join in, yet the experience never slows down.

Under the hood: How it works

- **Frictionless Access:** Passwordless, SSO, Social Login
- **Privacy & Compliance:** Consent Management
- **Strong Security:** Adaptive MFA
- **Risk-based Authentication**
- **Scalable Cloud Platform**

Partner & Third-Party Access Management

Now your partners are working effortlessly as if they're inside your own team.

Vendors, suppliers, and contractors connect instantly, with precisely the access they need - nothing more, nothing less. They collaborate securely across clouds and systems, while you maintain full visibility of every action. Growth doesn't lead to chaos; it creates trusted, seamless partnerships.

Under the hood: How it works

- Streamlined Onboarding: Automated Provisioning & Federation
- Granular Access: Role-Based Policies & Delegated Management
- Secure Collaboration: Standards-Based Integrations (SAML, OIDC)
- Centralized Auditing & Compliance Reporting

Workforce Identity & Access Management

Picture the moment your employees log in once to unlock everything they need wherever they are.

No more juggling passwords or getting stuck in workflows. From the office to home, their workday flows smoothly. Automated onboarding welcomes new hires, and offboarding keeps your business secure. Meanwhile, your IT team monitors quietly behind the scenes, confident that access is compliant, simple, and secure.

Under the hood: How it works

- **Unified Access: Single Sign-On Across Apps & Facilities**
- **Smart Security: Adaptive MFA & Zero-Trust Enforcement**
- **Lifecycle Automation: Onboarding, Offboarding, & Access Reviews**
- **Insightful Analytics & Policy Controls**

The IAM Platform **that does what others don't**

A robust IAM foundation is just the start. With decades of experience at the forefront of digital security, Thales delivers advanced capabilities and seamless experiences that redefine what's possible. Discover the unique advantages that make our solutions the trusted choice for organizations worldwide.

Integrated Consent Management

As the only IAM provider with built-in consent orchestration, Thales enables organizations to automate privacy compliance (GDPR, CCPA) at scale - no additional integrations required.

Unified Digital & Physical Access

Unify digital identities across IT apps, cloud services, and on-premises security (including physical devices like badges and VPNs) with centralized policy management and real-time analytics for comprehensive oversight.

Banking-Grade, Risk-Based Authentication

Our adaptive MFA leverages AI-driven risk analysis and biometric options for passwordless access, ensuring dynamic protection against evolving threats with minimal user friction.

Comprehensive FIDO2 Authentication Coverage

Deliver phishing-resistant authentication at scale with Thales' extensive FIDO2 device support - covering biometric keys, hardware tokens, and more for every user scenario.
